FUN AT THE FAIR

FUNFAIR LIFTING ACTION

NEW UNDERGROUND THEME PARK | CAMDEN | LONDON

We recently had a meeting with a world-renowned fairground operator who needed help and direction with making their funfair dreams come to life!

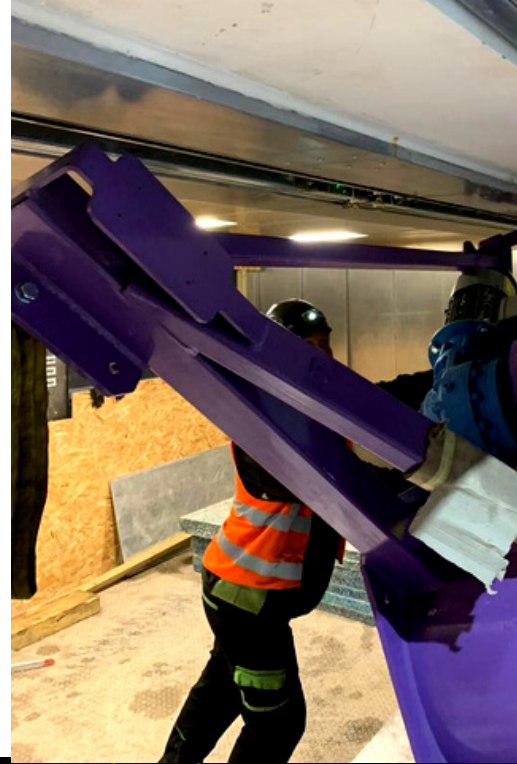

DSM were called in to assist with getting this seemingly impossible load into the basement of a Camden location for a new underground theme park extravaganza!

It wasn't possible to fit the drop tower into the lift to take it to the basement as the legs sat higher than the lift opening when placed horizontally. With DSM's intricate planning and lifting solutions, we came up with a plan of action!

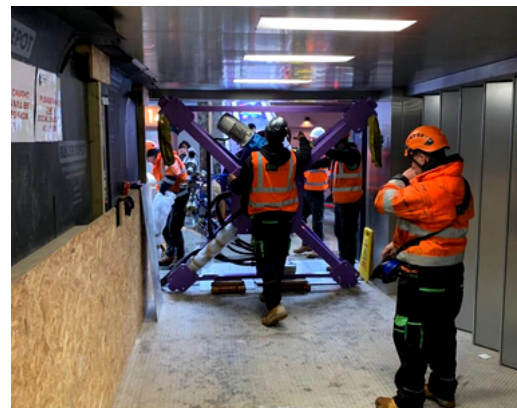

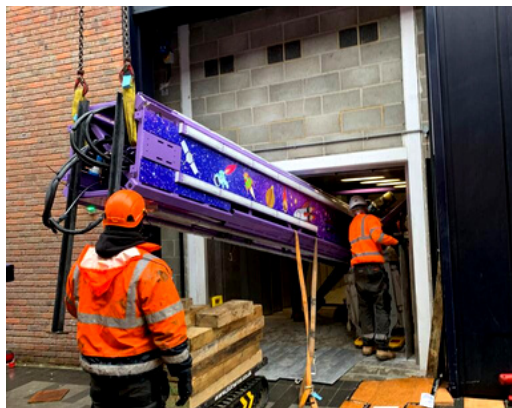

THINKING
OUTSIDE THE
BOX

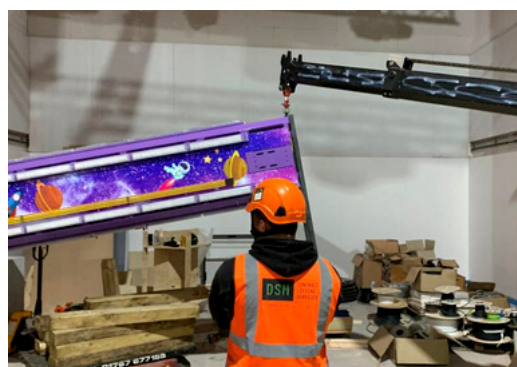

Due to the size of the items legs, it was unable to fit into the drop tower.

DSM collected the item from storage in Essex on one of our FORS sliver hiab lorries and then carefully manoeuvred the item into the lift on an angle to get it past the threshold. With the help of 'Cobra Lifting', who we appointed for support, we enabled a mini crane in the basement to do the exact opposite and remove from the drop tower, exiting the lift in the same manner that it was guided in.

Once out of the lift, we manoeuvred on our track carriers into the correct orientation, utilising ceiling mounted lifting points and the spider crane to tail the fair-rides supporting legs, enabling us to lift the drop tower vertically into its working position.

DSM Making concepts possible!
