Böcker AK52
PK 600-D
ACCESS PLATFORM

TECHNICAL INFORMATION

PK 600-D ACCESS PLATFORM

Introducing the PK 600-D access platform - a revolutionary new product developed specifically for use with the AK 52 truck crane. This platform boasts an impressive maximum basket load capacity of 600kg and can be hydraulically extended to a width of 3.5 metres while in operation, providing an unparalleled range of motion and access to even the most remote locations. Additionally, the platform can be hydraulically rotated a full 440 degrees, making it extremely versatile and flexible in any work setting.

The PK 600-D access platform is equipped with a built-in power supply in the cage, powered by a dedicated generator at the base of the Bocker AK 52. This feature allows you to work at height with the convenience of powered tools and equipment, eliminating the need for unsafe trailing leads.

SPECIFICATIONS

PK 600-D ACCESS PLATFORM
